

The webots file is located in the worlds folder.

You will need the following packages in order to run our project:

- Random
- Struct
- Ikpy
- Math
- Tempfile
- Math
- Pickle
- Gzip
- Numpy
- openCV
- Os
- Sklearn
- Copy

Ikpy is not actually needed for running our code, but sections of our code that are currently commented out require Ikpy to run.

Should another simulation need to be run, the world must be **RESET**, not simply restarted.
